LPR-36™ LINER PANEL

FEATURES

- 28 gauge steel panel
- 36" wide panel with 1-3/16" high ribs 12" on-center
- Available up to 48' in length
- Cool Cotton White SMP finish on the panel front; gray primer on the back
- Installed with self-drilling stainless steel capped color-matched fasteners

BENEFITS

- Economical, interior liner panel made of AZ50 coated steel
- Engineered for durability and aesthetically pleasing
- Attractive finished wall appearance

LINERS & SOFFIT SYSTEMS

LPR-36™ LINER PANEL

LPR-36 panels offer you enhanced interior wall integrity and quicker installation

When your project requires an attractive and functional interior wall, VP's LPR-36 is a great option. LPR-36 liner panel, is less expensive than wood or masonry alternatives.

This liner panel is an ASTM A792 Grade 33 AZ50 Cool Cotton White silicone modified polyester painted finish on the front and a gray primer coating on the back.

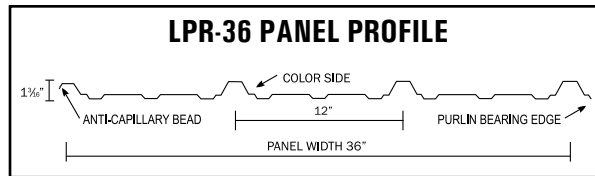

LPR-36 panels are 28 gauge steel and measure 36" wide with 1-3/16" high ribs. The panel is available in lengths up to 48'. This can eliminate the need for endlaps and assures enhanced wall integrity. The panels are attached with self-drilling, stainless steel capped color-matched fasteners.

In addition, the panel's wide module and long length availability minimizes sidelaps and endlaps which increases installation speed.

Panel Width: 36" coverage
Panel Length: Min. 2' Max. 48"*
Gauges: 28 ga.
Substrate: AZ50
Exterior Coating: Silicone Modified Polyester
Interior Coating: Gray primer
Finish: Smooth
Profile: Ribbed

LPR-36 can accommodate up to 6" of fiberglass blanket insulation for higher levels of energy efficiency.

Note: All panels formed from light gauge metal may exhibit waviness, also known as "Oil Canning," commonly occurring in, but not restricted to, flat portions of a panel. This inherent characteristic is not a defect of material or manufacturing and is not cause for rejection.
