PRESS RELEASE

Varco Pruden Announces 2016 Hall of Fame Award Winners

MEMPHIS, TN, March 10, 2016 – Varco Pruden Buildings today announced its 2016 Hall of Fame winners. This annual competition recognizes top projects by Varco Pruden (VP) builders that display innovation and excellence through the integration of VP building systems, products, architectural appearance, end use and design.

A total of 58 projects in 16 different building categories are included in this year’s Hall of Fame Awards.

“This year’s competition produced some impressive examples of the capabilities of our builder network,” said Jim Peckham, marketing manager at Varco Pruden. “Our building systems can meet the needs of virtually any commercial or industrial end-use. The list of winning projects shows the range of size, shape and architectural complexity that can be accomplished by our authorized builders and VP products.”

“The Hall of Fame awards provide an extraordinary opportunity to celebrate and recognize exceptional builders. These winners reflect the broad scope of capabilities and variety of end-use possibilities for buildings constructed by our builder network. VP builders consistently produce incredible results for their clients,” said Chuck Haslebacher, president of Varco Pruden.

This year’s Best of Category winners are listed below. For a list of all the winners, [click here](#).
